

LET'S GROW.™

Clover for Retail Businesses

Your retail operation needs flexibility to adapt to change and growth. Clover can help keep up with those demands.

With Clover, you can streamline your business with a sleek, customizable solution that can handle register functions, send digital receipts, manage inventory, and keep track of your customers and employees.

Key functions and apps include:

- Employee Management – Time clock, scheduling with shift trading & time off request, and team chat
- Inventory Management – Import items, set par values, receive low stock alerts, generate purchase orders
- Vendor Management – Assign items to specific vendors and store contact information for re-ordering
- Barcoding – Print barcodes for your inventory and scan with an internal scanner, popular external options, or an iOS or Android device
- Integrate Online & Social Media Sales – Prevent overselling by syncing retail and online inventory and streamline management of multi-channel selling
- Rewards & Loyalty – Customize a program to keep your customers coming back by staying in touch through email, text, or push notifications
- Quickbooks Sync – Keep your accounting update via an integration
