

Bond Market Turmoil

The bond markets this month have roiled by a combination of things that have driven prices down and interest rates up. Concerns over debt at all levels of government in this country, anxiety over future inflation pressures, the perceived failure of the latest Fed monetary easing, and the sovereign debt problem in Europe have combined to create bond volatility that will likely continue for a while. This presents both problems and opportunities for the investor. We can help you manage risks and take advantage of opportunities.

Call us and let's discuss.
